Certain Identity Manager functions can be controlled by HotKeys (keyboard shortcuts).

To change or disable HotKeys in Identity Manager:

1. Click "Settings", and then click the "Advanced Settings" tab.
2. For each feature, hold the keys down (for example, Ctrl+Alt+I to launch the Identity Manager) to change the HotKeys. Or, you can delete the existing HotKey to disable it.
3. Click "OK" to save your changes.
